

BTKM QUANTITY SURVEYORS

BTKM QUANTITY SURVEYORS

The practice (**BHAM TAYOB KHAN MATUNDA**) was established in 1984, and has over the past 29 years developed a footprint both locally and abroad. The practice has offices in **Johannesburg, Cape Town, Durban, Port Elizabeth, King Williams Town, Pretoria and Mthatha. Associated offices are located in Nigeria, Jordon, Bahrain, Mumbai and Mauritius.**

During the past three decades a significant number of projects covering a wide range of areas have been successfully completed. The Project Profile outlines the projects that BTKM has been involved in and reflects the range of experience and capability in the practice. The deep competencies inherent in the organization can effectively be applied to projects in respect of complexity, scale, specialised services, market-driven aspects and time/cost-constraints.

BTKM has a pro-active approach in deploying its traditional skills with formidable expertise in quantity surveying and project management. In addition, the practice has rendered services, which required strategic planning, and contextual cost modelling solutions, “fast-track” documentation, tenant cost control, as well as complex services and construction methods.

An important objective of the practice is to leverage intellectual capital within the organization, drawing on the various specialised skills and experience of directors and staff from other regions for the benefit of projects that require professional inputs.

THE PRACTICE

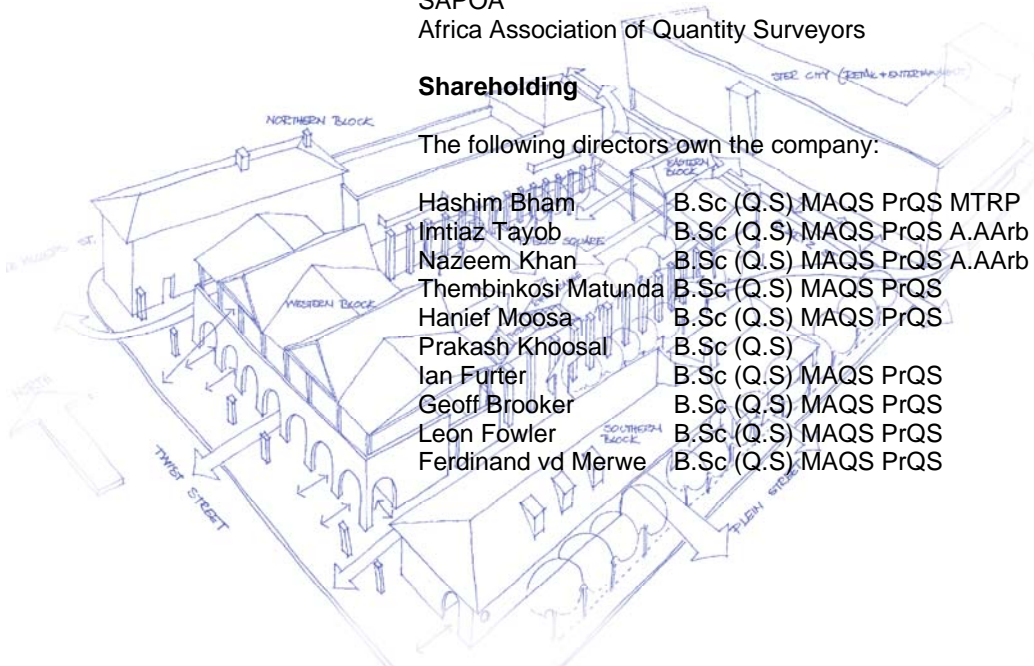

Registration with Professional Associations or Institutes:

The practice is registered with:
 The Association of South African Quantity Surveyors

SERVICES

Bham, Tayob, Khan & Matunda offers it's Clients a wide range of professional Quantity Surveying and Project Management services. BTKM has consulted to clients on a wide spectrum of project types. Projects worked on include office buildings, shopping centres, residential accommodation, sports stadiums, hotels, airport upgrade projects, railway station projects and other specialised and complex projects.

The practice provides comprehensive expertise in project and programme management, project viability evaluations, cost planning and control, cost advice, contractual advice, tender documentation, tender evaluation, cash flow forecasts, contract administration and ancillary specialised services.

The success of the practice is reflected in the growing market-share and penetration of the Quantity Surveying and Project Management Services market in both the public and private sectors.

MAIN FIELDS OF EXPERTISE

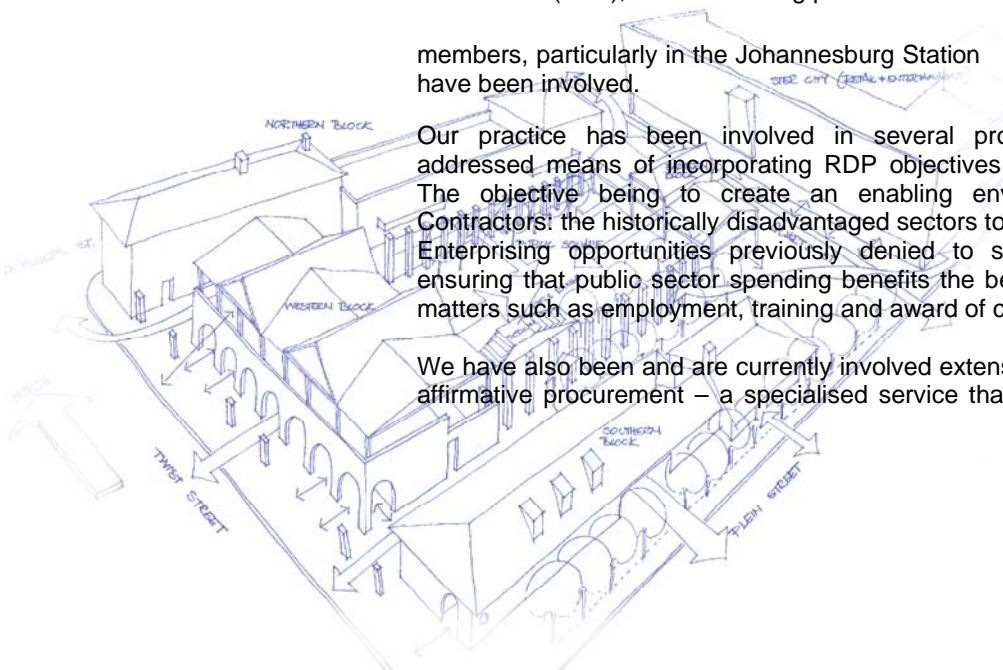

Besides the technical expertise and experience of the normal quantity surveying functions such as feasibility studies, estimating, cost planning, tender documentation, cost management and control, the partners have, in all our centres, extremely strong links and have been instrumental in providing opportunities to emergent local contractors and sub contractors both on a small and large scale.

In particular, we have been intimately involved in the past in securing the approval and participation of black contractor organizations such as the National Black Contractors and Allied Trades Forum (Nabcat), the National African Federation for the Building Industry (Nafbi) and the African Builders Association (ABA), in the tendering procedure and the participation of their

members, particularly in the Johannesburg Station Precinct projects that we have been involved.

Our practice has been involved in several projects which specifically addressed means of incorporating RDP objectives in construction projects. The objective being to create an enabling environment for Emerging Contractors: the historically disadvantaged sectors to manage and administer Enterprising opportunities previously denied to such groups as well as ensuring that public sector spending benefits the beneficiary communities in matters such as employment, training and award of contracts.

We have also been and are currently involved extensively in the monitoring of affirmative procurement – a specialised service that we offer to our Clients.

EMPLOYMENT EQUITY

Current status: Our Quantity Surveying practice is among the first in the country that was established in 1984 entirely by members of the disenfranchised communities, with representation nationally.

The shareholding of our practice is almost wholly owned by members of the previously disenfranchised and disadvantaged communities. Our staff profile represents our commitment to real and effective empowerment of these communities, comprising almost entirely of previously disadvantaged population groups.

POLICY

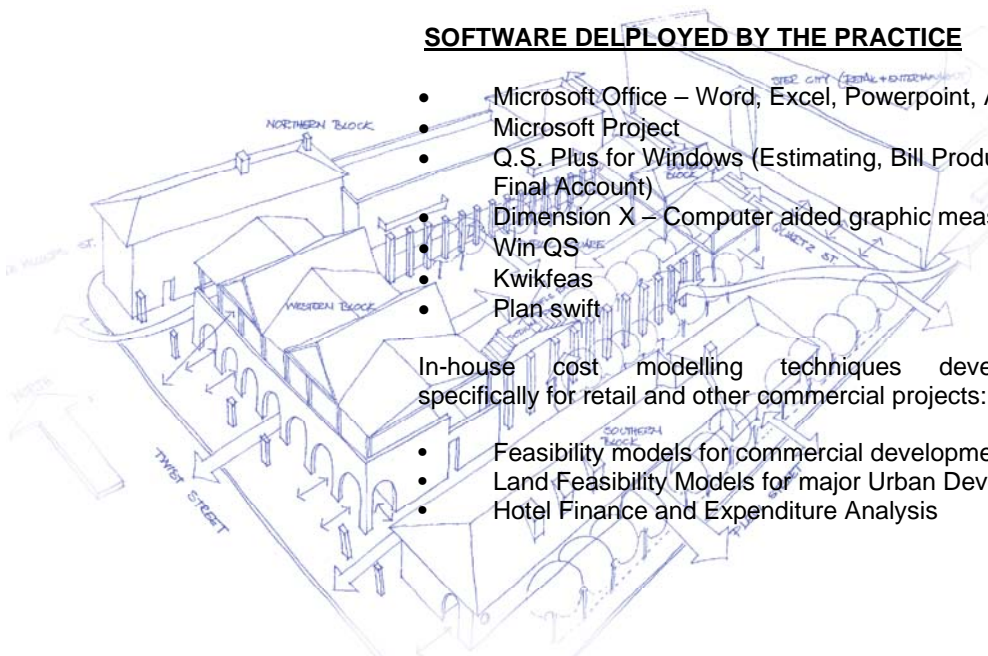

The practice has played a significant role in generating interest in the Quantity Surveying and training support is considered a duty and policy of the company. We have trained and continue to train graduates of the previously disadvantaged from universities and technikons with special emphasis on specialised skills and professional development. Since inception, our practices has trained in excess of eighty quantity surveying graduates from the previously disadvantaged groups and currently boast a Cooperative Education Award from Peninsula Technikon for the training given by our practice to students from the Peninsula Technikon.

Many of our professional staff has risen to key positions in our practice in a very short space of time and some of our previous staff members have also established their own practices or formed contracting companies.

COMPUTER RESOURCES

Of crucial importance in contemporary Quantity Surveying and Project Management are the extent of computerisation and the use of sophisticated cost modelling techniques. BTKM ranks amongst the more 'computer enabled', within the industry in Africa. All of BTKM offices are supported by advanced systems in, computerised feasibility, programming, cost modelling, estimating, measurement, contract administration and final accounting.

SOFTWARE DEPLOYED BY THE PRACTICE

- 
- Microsoft Office – Word, Excel, Powerpoint, Access
 - Microsoft Project
 - Q.S. Plus for Windows (Estimating, Bill Production, Valuations and Final Account)
 - Dimension X – Computer aided graphic measurement software
 - Win QS
 - Kwikfeas
 - Plan swift

In-house cost modelling techniques developed and designed specifically for retail and other commercial projects:

- Feasibility models for commercial developments
- Land Feasibility Models for major Urban Developments
- Hotel Finance and Expenditure Analysis

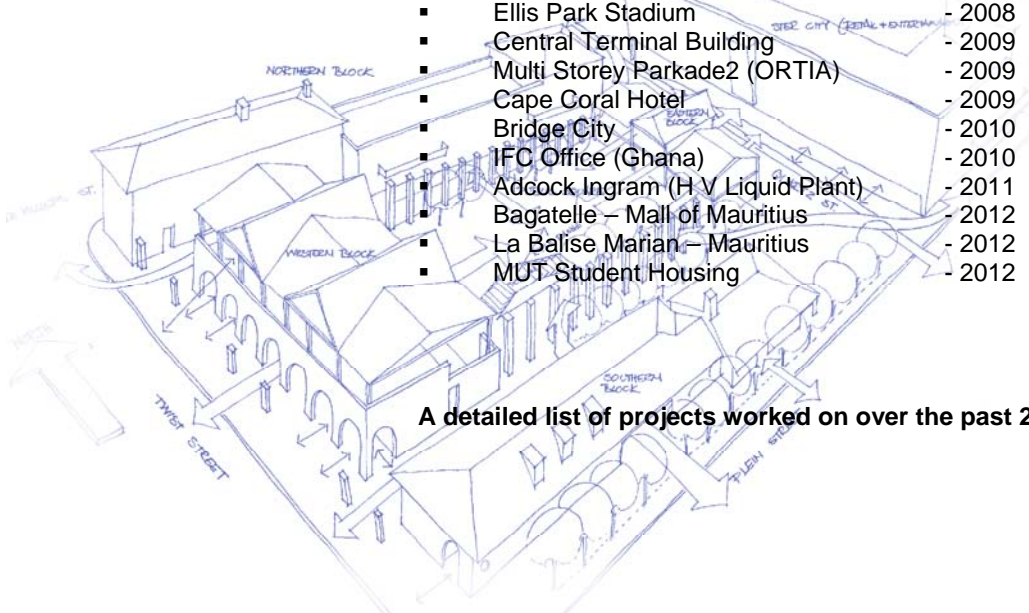

- Residual Land Value Analysis
 - Residual Lease Value Analysis
 - Tenant Account Cost Controls
-
- Project Payment Schedules for total Capital Cost Budgeting & Control
 - Management and Cost Reports incorporating tenant recoveries, etc.

MAJOR & COMPLEX PROJECT EXPERIENCE:

The principles of Quantity Surveying are generally applicable to most project types. Complex projects require that these same principles are applied, but enriched further by additional specialist advice and input, as well as development cost acumen and cost modelling systems.

Outlined below are selections of a few major projects that display a varied range of experience in different construction and development areas. A more detailed list of projects is available on request.

▪ V & A Marina Residential Sector 2	- 2004	R540	m
▪ Knightsbridge	- 2004	R150	m
▪ Vangate Mall	- 2004	R167	m
▪ The Sails @ Timeball Square	- 2005/06	R300	m
▪ Prabhadevi Mall	- 2006	R100	m
▪ ACSA Parking Deck	- 2006	R394	m
▪ Vodacom Smart Park Office Complex	- 2006	R65	m
▪ Vodacom Techno Park	- 2007	R288	m
▪ UKZN Biology Building	- 2007	R80	m
▪ Richmond Shopping Centre	- 2007	R40	m
▪ Albaraka Bank	- 2007	R50	m
▪ George Airport	- 2007	R42	m
▪ Cerebos Factory in Coega IDZ	- 2007	R50	m
▪ Logistics Park in Uitenhage : Factories and Warehouses	- 2007	R83	m
▪ Vodacom Call Centre	- 2008	R50	m
▪ Bridge City	- 2008	R480	m
▪ V & A Marina Residential Sector	- 2008	R635	m
▪ Worcester Casino & Hotel	- 2008	R225	m
▪ Mooirivier Mall (Potchefstroom)	- 2008	R560	m
▪ Ellis Park Stadium	- 2008	R100	m
▪ Central Terminal Building	- 2009	R1.2	B
▪ Multi Storey Parkade2 (ORTIA)	- 2009	R550	m
▪ Cape Coral Hotel	- 2009	R173	m
▪ Bridge City	- 2010	R510	m
▪ IFC Office (Ghana)	- 2010	R130	m

▪ Bagatelle – Mall of Mauritius	- 2012	R750	m
▪ La Balise Marian – Mauritius	- 2012	R1	B
▪ MUT Student Housing	- 2012	R100	m

A detailed list of projects worked on over the past 29 years is available

AFFIRMATIVE ACTION: POLICY, PROGRAMME AND ACHIEVEMENTS

Policy:

The tragic distortions and imbalances of past government policies require effective and responsible intervention to empower the disadvantaged and disenfranchised communities by economic, skills and capacity development.

BTKM is committed to effective and constructive intervention to redress these imbalances. However, affirmative action must be viewed as a transitional and short-term measure to "level playing fields". BTKM believes that the long-term agenda of policy makers must not lose sight of ***meritocracy, the quest for excellence, an entrepreneurial and competitive spirit and a culture of good moral and work ethic.***

Programme and Achievements:

As previously outlined, the shareholding of the practice is wholly owned by members of the formerly disenfranchised and disadvantaged communities. The staff profile represents the commitment to real and effective empowerment of the disadvantaged communities, in the profession. This Quantity Surveying practice is among the first in the country that was established by members of the disenfranchised communities, with formidable representation nationally. The practice has played a significant role in generating interest in the Quantity Surveying profession among the Disenfranchised communities. Financial and training support is considered a duty and policy of the partners.

BTKM has trained and continues to train graduates from Universities and Tertiary Institutions with special emphasis on specialised skills and professional development.

Many of BTKM's professional staff has risen to key positions in the practice in a very short space of time and some of the previous staff members have also established their own practices or formed contracting companies. Initiatives of substantial scale and large projects present a rare opportunity to employ and train additional staff from the affected communities. Projects of scale also offer the opportunity to further sponsor and offer peer support to students previously denied such opportunities. The practice is committed to such engagement.

BTKM has previously consulted on projects that specifically embraced policies of empowerment, capacity building and wealth creating opportunities, which were applied to the construction process. BTKM has acted as empowerment consultants and offer our Clients a tailor made empowerment solution with auditable results.

PROFESSIONAL INDEMNITY INSURANCE

Value of Professional Indemnity:
We have an existing policy for a cover of R 10 000 000.00.

A copy of the schedule of our Professional Indemnity insurance is available on request.
